Risks

Guinness Sustainable Energy Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The Fund invests only in companies involved in the sustainable energy sector; it is therefore susceptible to the performance of that one sector, and can be volatile. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement, you may not get back the amount originally invested. Details on the risk factors are included in the Fund's documentation, available on our website. Graph data is in USD.

Performance Notes

Simulated past performance in 5,10 year and since launch numbers. Performance prior to the launch date of the Y class of the Fund (16.02.2018) is a composite simulation for Y class performance being based on the actual performance of the Fund's E class which has an OCF of 1.24%. Source: FE fundinfo to 30.04.22. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF for the share class used for the fund performance returns is 0.67%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return. Graph in USD.

Fund Profile

Aim

Long-term capital growth

Investment Case

Provides pureplay exposure to global renewable energy markets. We believe that over the next twenty years the sustainable energy sector will benefit from the combined effects of strong demand growth and improving economics of renewable energy supply. The sector will benefit from both public and private support for low carbon technologies.

Process

50% top down, 50% bottom up. Value bias in bottom-up stock selection

Portfolio

Concentrated equally-weighted portfolio of 30 positions. Majority of Fund invested in stocks over \$500m in size.

Investment Policy

An equity fund which invests in companies in the solar, wind, hydro, geothermal, biofuels, biomass and energy efficiency sectors.

The Fund is actively managed and uses the MSCI World Index as a comparator benchmark only.

Lower RiskHigher Risk

The risk and reward indicator shows where the fund ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but the greater the risk of losing money. The shaded area in the table shows this fund's rank. The fund is ranked as higher risk as its price has shown high fluctuations historically. This is based on how investments have performed in the past and you should note that the fund may perform differently in the future and its rank may change. Historical data may not be a reliable indicator for the future.
